Company Profile

CTA Solutions LLC was founded by our Managing Partner, Carl A. Adams in 2004. CTA Solutions has over 20 years of Enterprise Information Technology, Security Risk Management and Systems Engineering delivery experience to both the public and private sector. CTA's distinguishing capability is its overall enterprise experience, understanding and knowledge of building strategic solutions and processes. We use sound industry standards that address our customers business drivers. CTA provides a comprehensive understanding of emerging computing and network centric technologies and their innovative application to meet tactical challenges with innovative and strategic solutions. CTA is fully engaged in the development of next-generation system solutions to replace legacy system architectures with fully integrated network-enabled, automated and data-driven enterprise architectures using a comprehensive Approach. Our knowledgeable staff provides a broad range of quality, cost-effective services.
